This year's AP scores definitely reflect the unique circumstances of the Covid-19 pandemic. As we know, students received far less instruction this year than in the past, and the tests were taken under far different conditions. Despite this, LHS still maintained a high level of performance. Here are some highlights:

- All subjects performed well above state and national averages
- LHS administered the most AP tests since 2016
- The following subjects had over 90% of test takers score a 3 or higher: Biology (91%), Calculus AB (94%), Calculus BC (100%), English Lit (100%), World History (96%)
- Overall, 86% of LHS test takers scored 3 or better

We are extremely proud of the work of our AP students and teachers. The 2020 scores reflect a high level of resiliency and perseverance in the face of unprecedented challenges.
