

Perfect Timing, Lincoln!

A Once-in-a-Generation Opportunity for Our Students

On Nov. 7, Lincoln voters will have an opportunity to invest in our town's future while reducing our tax burden. If the \$25M bond referendum passes, Lincoln can provide our undersized elementary schools with gyms, STEM rooms and renovated cafeterias – and maximize state funding to save over \$13 million.

The Time Is Right

- ★ By leveraging state bonuses, Lincoln would receive at least **50% reimbursement** (the **State will pay over \$13M** of the project).
- ★ Acting now will let us line up the new bond with retiring debt, **reducing Lincoln's annual tax burden by \$1 million.**

Out of Date

- ★ While Lincoln has a modern high school and middle school, our elementary schools are **old and cramped.**
- ★ Lincoln's elementary schools offer students **barely one third of the gym and cafeteria space** they deserve.

Building for the Future

The bond will allow us to:

- ★ Invest more than **\$6 million per school;**
- ★ Build **new gyms** at each school;
- ★ Convert existing gyms to **modern cafeteria/learning spaces;** and
- ★ Create first-ever **STEM (science, technology, engineering and math)** rooms.
